Markdown stays editable. This PDF is the reading/share copy.

Boundary: this project is still a POC, not operational guidance.

ADR 0004: Unreal Is Not the Source of Truth

Status

Accepted for the POC architecture.

Context

If Unreal owns scenario rules, replay and alternate clients become much harder. The same session could behave differently depending on the client.

Decision

The backend owns session order, transitions, validation results, and logs. A future Unreal client sends normalized actions and displays the state it gets back.

Consequences

The engine stays usable by any client and testable without Unreal. A future client must be ready to accept backend state as the final answer, even if there is delay or correction.
