Future Sensing Adapters

Source: docs/architecture/future-sensing-adapters.md

Markdown stays editable. This PDF is the reading/share copy.

Boundary: this project is still a POC, not operational guidance.

Future Sensing Adapters

Status: future idea, not part of this POC.

One day, inputs might come from speech, gestures, location, equipment, or other sensors. Those inputs are messy, so they should not go straight into the scenario engine.

A future sensing adapter would translate an observation into a possible trainee action, along with details like confidence, source, timing, privacy handling, calibration, and whether a human confirmed it.

For now, all actions are manual or scripted. This repo makes no multimodal sensing claims.
