Emergency Training Simulator POC

Markdown documentation PDF copy

Entry Door POC Object

Source: assets/metadata/entry-door-poc.md

Markdown stays editable. This PDF is the reading/share copy.

Boundary: this project is still a POC, not operational guidance.

Entry Door POC Object

Status: scenario metadata only. No mesh exists yet.

The smoke-room scenario now includes a simple entry door.

What matters now:

- open_state: closed or open
- blocks_path: whether the door blocks room entry

Metadata for later:

- locked
- door_type
- hinge_side
- swing_direction
- collision_shape
- mass_kg_estimate
- force_preview

The lock and door type do not control behavior yet. They are only notes for future work.

There is no real door physics, collision, force, lock simulation, Unreal scene, or generated door asset.
